

## 12V Compact Door Kit - One Door

The Compact Door Kit represents a powerful and convenient solution for your Wiegand access control needs. Pre-wired and meticulously designed, this kit is your answer for seamless integration into existing systems, offering a hassle-free installation experience. It is more than just a wireless bridge – it is a cleverly designed, space-saving system that integrates high-tech access control with a secure backup power system.

One of the standout features of this kit is its compatibility with 12V DC battery chargers. This feature ensures continuous operation of your access control system, even in the event of a power outage. It eliminates the risk of being locked out due to power issues, providing peace of mind knowing that your access control system will always be functional.

In short, the Compact Door Kit is a comprehensive solution that combines advanced wireless technology, backup power capabilities, and ease of installation into one neatly packaged unit. It is the perfect choice for anyone looking for a reliable, uninterrupted access control system.

## Benefits

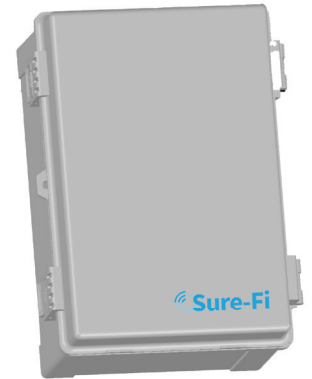

The Sure-Fi Compact Door Kit's compact design means it fits seamlessly into any environment without being obtrusive. Yet within this small footprint, it packs the technology to provide reliable, secure control over access points. The pre-wired enclosure speeds up and simplifies the installation process, making it easy to get your system up and running quickly.

## Characteristics

- Works for 12-24 VAC/DC general purpose relay control.
- 8 Solid State Relays (5 with shared common, 3 Form A)
- Connect up to 8 expansion units to one controller
