

Fire Module Bridge Kit

The Fire Module Bridge Kit by Sure-Fi is a cutting-edge solution designed to enhance fire alarm systems with advanced connectivity and control capabilities. With its UL Listing for Safety, this kit ensures compliance with rigorous industry standards, providing peace of mind and reassurance when it comes to the safety and reliability of your fire alarm system. The kit features an 8/2 relay configuration, allowing for flexible and efficient control of various fire alarm components, such as sirens, strobes, and other crucial devices.

Benefits

One of the standout features of the Fire Module Bridge Kit is its 1:Many capability. This means that a single bridge can communicate and interface with multiple endpoints within the fire alarm system, streamlining the connectivity and control process. This capability simplifies the wiring and configuration requirements, reducing complexity and saving time during installation and maintenance procedures. With the 1:Many capability, the Fire Module Bridge Kit offers scalability and adaptability, allowing for seamless integration and expansion of the fire alarm system as needs evolve.

Features

- UL Listed for Safety 8/2 Relay Configuration 1:Many Capable

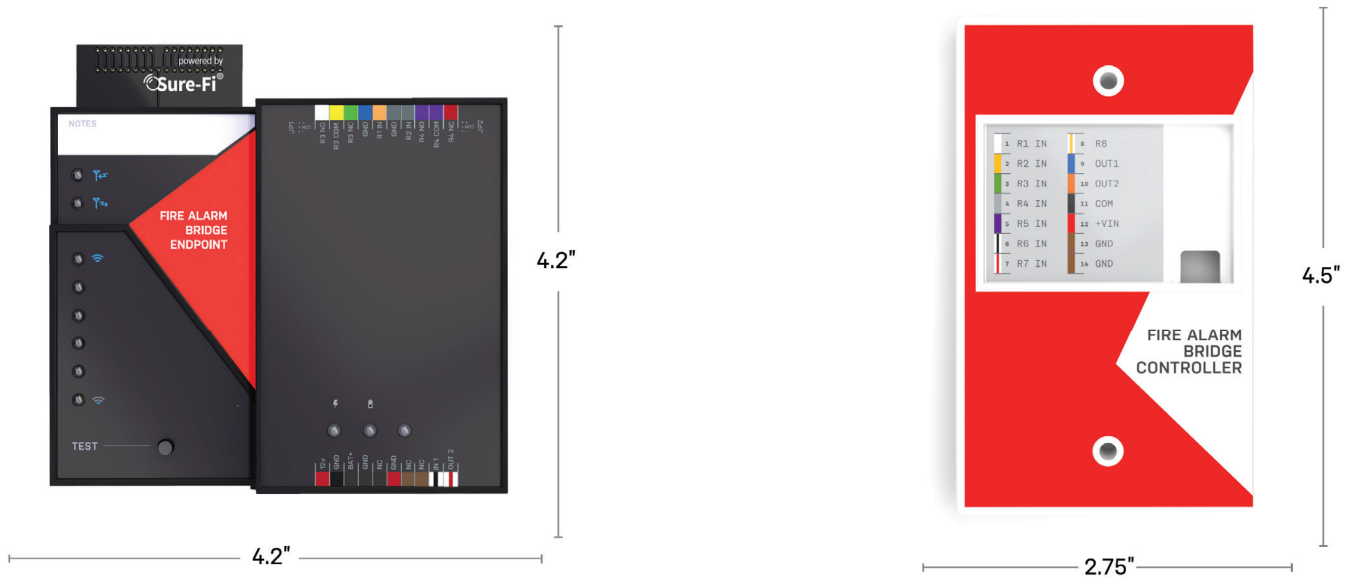

Fire Module Bridge Kit
SFK-FIRE-911

Up to 1 mile range through obstructions and 50+ miles line-of-sight with patented Bunker Busting Technology. Using 900 MHz, works inside metal enclosures
Proprietary PCB Antenna design as well as FCC (USA) and IC (Canada) certified.

Specifications

- Operating Voltage: 24 VAC +/- %5
- Transmit Power: 1 Watt (30dBm)
- Frequency Band: 902 - 928Mhz
- Channels: 72 (Frequency Hopping)
- Link Budget: 163dB
- Range: up to 1 mile through Obstructions. Greater than 40 Miles line-of-sight
- Security Encryption: AES128
- Endpoint Relays: 1A 60 V Peak NO, COM
- Operating Temperature: -40oC to +85oC (-67oF to +257oF)

5 Year Warranty
